sches Made Regarding Same at Recent Banquet at Manila.

Wanila, Oct. 5 .- The Federal party given a banquet to the delegation r leading natives of the archipelago he have recently returned from a vis to the United States. In their seches the members of the delegaon spoke in generous praise of the continent accorded them in the United states. Each touched on the indesendence move and made an urgent nies for a popular assembly at once and full independence at an early date, except Victorino Mapa, associate jusdice of the supreme court, who spoke in a different tone. He advised his people to have confidence in the people of the United States and to prepare for the time when their hopes would be fulfilled and when he finished he was warmly cheered. His address was an able and impressive one and he gave the guests some important facts bearing on the subject of independence. He spoke as follows:

"Some seem to think that independence will work miracles and bring about the millenium. You make the claim, and I believe that your claim is just, that with opportunity and experience, you are capable of better things. The aspirations of a people or individual for better things are praiseworthy if they are consistent, sensible and reasonable in character. The South American republics, where each country is torn continually in factional strife are fashioned after the United States model, but they have demonstrated that the people have nade a failure in self-government, Now the Americans arrivat here was the result of an accident, the victory of Manila bay. They themselves charged with the responsibility of government and felt it their duty to take care of the country until it should develop ability to take care of themselves. What the returning commissioners say about the kindly feeling throughout America, and the purpose to give them the greatest degree of liberty is the truth today and ever since we put our foot on these islands it has been the truth—the same old truth. Is it not true that you now elect your municipal and provincial officials and that a greater number of the employers of the government are Filipinos? Have you not three representatives on the commission itself.? How many more centuries would you have remained here under Spanish rule before you would have enjoyed what you have under six years of American occupation?

"How often do you think it would be possible for the federal party to give a banquet where the guests could talk freely of independence? As much as we endeavor to do for these people you can readily understand how any distrust of hostility would interfere with the good work we have just started. It seems to me that not academic but real, practical questions confront us. The wild man who goes naked is independent, but I do not believe that he is a model for us."
